The search for Craftsman manuals online using the company website is a simple process. Starting from 2019, the company offers four different research options to find manuals and products. The first option is for models starting with 247 or CMX-XX-AM. The second option is for model numbers starting with 917 or CMX-XX-AH. The third is for models starting from 107, 130, 500, 502, 536 or 580 or with CMX-XX-A. The last one is for models starting with cm. What happens if you can't find your manual? If you are looking for an old Craftsman repair manual, finding it can be demanding. Some Craftsman repair manuals may not be more available online. If you can't find the Craftsman manual you are looking for online, the company encourages customers to send an e-mail or call the customer support line. If you do, they can be able to direct to a Craftsman repair center where someone can manage the repairs you are attempted. Use the Searsper website, the Craftsman brand and the Sears shop seemed to go hand in hand. Due to this association, the shop has made it possible to search for Craftsman manuals on the company's website. Use the "Find manual" section of the Sears site to look for everything from a Tosaerba Craftsman manual to a craftsman blower manual. The website also recommends using mangemylife.com to find Craftsman manuals online. Using the site for the search for mangemylife.com you redirect you with the Sears Parts Direct website. L, you will find a remarkable quantity of information on Sears products. Scroll through the page and, in the center, you will see a button that reads     Search Manuals    . By clicking on this I take you to where you can find Craftsman manuals online. Or, as we like to say, "in our joint years of entrepreneurship, we        ve made all the startup mistakes ourselves        and we        ve catalogued them in The Owner        s Manual so you done         have to make them too.        f we had to summarize the Owner        s Manual in a single sentence, it        d be simple to choose:         Get out of the Building!         Why? Because today        s startups seldom fail for lack of technology or product; they fail most often because of their inability to find customers. So the core of Customer Development is blissfully simple: Products developed by founders who get out of the building early and often, win. Products handed off to sales and marketing organizations that are only tangentially involved in the product development process will lose.          The Owner        s Manual and the Customer Development model it details push startup founders out of the building, where customers live, to transform an entrepreneur        s guesses about his or her business model into facts. Getting out of the building means acquiring a deep understanding of customer needs, and combining that knowledge with incremental and iterative product development.And when you blend Customer Development with Agile product development, the result is a product that evolves over time based not on the opinions of founders or investors, but on feedback from the folks who will ultimately buy it        the customers! In the process, it reduces the need for massive early infusions of capital and eliminates wasted time, money, and effort.Face-to-face customer feedback refines or validates every component of the startup        s business model, not just the product itself. Who are my target customers, where will they buy my product, how much will they pay, and how will I         get, keep, and growe         my customers are among the many key questions posed by the startup business modele        and answered with customer feedback.Stay tuned for more excerpts from The Startup Owner's Manual.
